

# 3D OCT Retina Wellness Screening

---

We are proud to provide our patients with the most advanced technology available in retinal imaging today. Our ability to view your internal retinal health is dramatically improved with the 3D OCT-1 Maestro. Our goal is early detection of retinal problems such as retinal holes, retinal detachments, diabetic retinopathy, hypertensive retinopathy, macular degeneration, glaucoma, and eye cancers.

The OCT Wellness Screening simultaneously provides a digital photo and a 3D cross-section scan through the layers of your retina using light waves, scanning your eye without touching it. The images provide detailed mapping of each distinctive layer, many of which are beneath the surface and not visible to your doctor during routine examination. Images over time can be compared for early detection of potential eye diseases as well as tracking progression of existing conditions. The 3D OCT-1 Maestro is fast (a couple of minutes), easy and comfortable, and Dr. Woodall will review the results with you at today's visit.

Dr. Woodall would like for ALL of her patients to have a Maestro Wellness Screening annually (or at the very least a baseline, initial image). It is important to note that this is not a substitution for a dilated retinal exam, but provides a more extensive look than examination alone.

**PLEASE CHECK ONE OF THE FOLLOWING:**

I **elect** to have a 3D OCT Wellness Screening of my retina.

I **decline** the Wellness Screening.

The fee for this state of the art imaging procedure is **\$29.99**.
